(54) PRESSURE-SENSITIVE ADHESIVE SHEET AND ITS MANUFACTURING METHOD

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a pressure-sensitive adhesive sheet which secures sufficient adhesive force without adversely affecting the external appearance of the pressure-sensitive adhesive sheet and can prevent or remove trapped air or a blister, and a method for manufacturing such a pressure-sensitive adhesive.

SOLUTION: In the laminated sheet obtained by laminating a decorative layer 14, a base material 11, a pressure-sensitive adhesive layer 12, and a releasing material 13, a plurality of penetrating holes 2 which penetrate from one side of the laminated sheet to the other side are formed. The hole diameter of the penetrating holes 2 is set to 0.1-300 μ m and a hole density is set to 30-50,000/100 cm². Such penetrating holes 2 are preferably formed by laser processing.
